

Jolly Badger

Entry-level Photo ID Card Software

Jolly Badger is Jolly Technologies' entry-level solution for the design and production of ID cards. The designer includes rich text formatting, text from database fields, images from database fields, images from files, shapes with exact color matching and gradient fills, 1D barcodes, magnetic stripe encoding, double-sided printing, design layers, ghosting, alignment tools and conditional print objects. Jolly Badger includes a database capable of storing up to 200 cardholder records, expediting cardholder enrollment and ID card production.

JOLLY

Product Highlights

- Design cards using powerful graphics and layout tools
- Add, text, logos, graphics & photos
- Include rich text from the database
- Encode 1D barcodes and magnetic stripes
- Conditionally print design elements based on record values
- Design multiple card layouts within one template using conditional layers; automatically print the appropriate card based on database criteria
- Capture photos from any TWAIN / WIA compatible camera and improve image quality using the integrated image editor
- Add up to 200 database records
- Designs and data are forward compatible with Jolly's ID Flow Editions
